Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Josh:

Drs. Nanney and Steiner are giving a general genetics lab here, and I am supposed to inject a couple of bacterial experiments into it. I wonder if you would be so kind as to send me a pair of complementary auxotrophs of K-12 so we could demonstrate the classical recombination experiment. Any other suggestions you might have for suitable class experiments would be greatly appreciated--bearing in mind that these are geneticists who mostly know no bacteriology.

Probably I will not be here very long, as I have received an induction notice from the Selective Service and am still free only because I am being transferred for delivery from California to Michigan. Probably I will be out about one more month.

Give my regards to Esther and to Boris Rotman and Dave Shaar--also to Seymour when you see him next.

Sincerely,

Allan Campbell
